

OSI - Reporting of Reconnaissance for Higher Levels

On 6 March 1964

Wheelon approved a ten-day mission-by-mission report

;with OSI taking the lead in creating the document with
OSA and OEL participation, final text to be distributed
through the DD/S &T himself.

X
OSI - Collection Guidance Staff of DD/I

The proposed CGS as seen by the DD/I would seek to be
a useful "management mechanism" in assisting intelligence
production and info collection to meet the needs of the
Agency and the Intelligence Community. Dr. Wheelon was
opposed to this broad charter and wished to ensure that
CGS would concern itself with certain requirements matters
as opposed to management matters properly the responsi-
bility of other Directorates. He also felt the CGS should
be recognized as a DD/I unit, not as an Agency-wide or
national level intelligence mechanism.

with the DD/I's statement
He also recorded his emphatic agreement that CGS was not
intended in any way to interfere with analyst-collector
contacts on the technical level or to interpose a channel
or service where none was needed on any given problem.
